Amendments to the Claims

Claim 1. (Currently Amended) A method of providing a milk clotting composition

polypeptide preparation having a content of undesired enzymatic side activities at such a level

that they do not restrict the applicability of said polypeptide preparation for its intended purpose,

the method comprising the steps of:

(i) providing a medium having a pH of 2.0 or higher that comprises

chymosin and in addition at least one undesired enzymatic side activity which is

glucoamylase and

(ii) subjecting said medium to a pH between about 1.8 and about 2.0 about 1.7

to about 1.9 for a period of time of at least 2.5 hours a period of time that is sufficient to

at least partially inactivate at least 50% of enzymatic activity of said glucoamylase while

maintaining at least 85% of the partial enzymatic activity of said chymosin.

Claims 2-4. (Cancelled)

Claim 5. (Currently Amended) A method according to claim 1 elaim 4, wherein at least

90% of said glucoamylase is inactivated.

Claim 6. (Currently Amended) A method according to claim 1, wherein the medium

having a pH of 2.0 or higher is a medium derived from the cultivation of an organism that during

its cultivation produces said chymosin and said glucoamylase.

Claim 7-8. (Cancelled)

Claim 9. (Previously Presented) A method according to claim 1, wherein the medium

having a pH of 2.0 or higher is derived from the cultivation of an organism that is selected from

the group consisting of an animal species, a plant species, a bacterial species, a yeast species and

a species of filamentous fungi.

3

Appl. No.: 09/779,560 Atty. No.: 58982.000002

Confirmation No.: 6162

Claim 10. (Previously Presented) A method according to claim 9, wherein the bacterial

species is selected from the group consisting of a gram negative bacterial species and a gram

positive species.

Claim 11. (Previously Presented) A method according to claim 9, where the yeast species

is selected from the group consisting of Saccharomyces cerevisiae, a methylotrophic yeast

species and a Klyuveromyces species.

Claim 12. (Currently Amended) A method according to claim 9, wherein the species of

filamentous fungi is selected from the group consisting of an Aspergillus species, a

Cryphonectria species, a Fusarium species, a Rhizomucor Rhizomucor species and a Trichoderma

species.

Claim 13. (Currently Amended) A method according to claim 1, wherein the medium

having a pH of 2.0 or higher is subjected to a pH between about 1.81.7 to about 1.91.8.

Claim 14. (Currently Amended) A method according to claim 1, elaim 13, wherein the

medium having a pH of 2.0 or higher is subjected to a pH between about 1.9 to about 2.0the pH

is between about 1.7 to about 1.75.

Claim 15. (Cancelled)

Claim 16. (Currently Amended) A method according to claim 1, wherein the medium

having a pH of 2.0 or higher is subjected to a pH of about 1.9the pH is about 1.8.

Claim 17. (Currently Amended) A method according to claim 1, wherein the pH between

about 1.8 and about 2.0 1.7 and 1.9 is provided by adding an inorganic or an organic acid.

Claim 18. (Currently Amended) A method according to claim 1, wherein said period of

time is in the range of 0.1 minutes 2.5 hours to 48 hours.

4

Claims 19-28. (Cancelled)

Claim 29. (Previously Presented) A method according to claim 1, wherein the chymosin

is derived from a mammalian species selected from the group consisting of a ruminant species, a

Camelidae species, a porcine species, an Equidae species and a primate species.

Claim 30. (Original) A method according to claim 29, wherein the ruminant species is

selected from the group consisting of a bovine species, an ovine species, a caprine species, a deer

species, a buffalo species, an antelope species and a giraffe species.

Claim 31. (Currently Amended) A method according to claim 29elaim 30, wherein the

mammalian derived chymosin is naturally produced in a mammalian species.

Claims 32-34. (Cancelled)

Claim 35. (Previously Presented) A method according to claim 10, wherein the bacterial

species is selected from E. coli and Bacillus.

Claim 36. (Previously Presented) A method according to claim 9, wherein the yeast

species is selected from Pichia pastoris and Klyuveromyces lactis.

Claims 37-38. (Cancelled)

Claim 39. (Previously Presented) A method according to claim 29, wherein the

Camelidae species is Camelus dromedarius.

Claims 40-41. (Cancelled)

Claim 42 (Previously Presented). The method of claim 12, wherein said Aspergillus species is

Aspergillus niger var. awamori.
